

FACTSHEET

THE BUNKER'S AWS SERVICES

Accelerate your hybrid cloud adoption

THE HYBRID IT EVOLUTION

The technology landscape is undergoing a major shift, moving away from a singular on-premises strategy towards a hybrid approach. Today, many businesses are opting for a hybrid cloud model, migrating some infrastructure to the cloud, while continuing to maintain some critical services on premise or with their hosting provider.

This model is a commercially viable option for start-ups, Fintechs and other companies make large upfront investments in hardware, as you only pay for what you consume. It's also ideal for developers, as they can test scenarios on a sandboxed environment without impacting their production services.

INTRODUCING AMAZON WEB SERVICES:

AMAZON WEB SERVICES (AWS) IS A SECURE PUBLIC CLOUD SERVICE. COMPRISING AN ESTIMATED 1.3M SERVERS, AWS OFFERS THE ON-DEMAND DELIVERY OF COMPUTE POWER, DATABASE STORAGE, APPLICATIONS AND OTHER IT RESOURCES THROUGH ITS CLOUD SERVICES PLATFORM VIA THE INTERNET WITH PAY-AS-YOU-GO PRICING. WITH A GLOBAL REACH ACROSS 190 COUNTRIES, IT'S ESTIMATED THAT AWS HAS MORE THAN 10 TIMES THE COMPUTE CAPACITY OF ITS ALL OF ITS 14 CLOSEST RIVALS COMBINED.

ACCELERATE YOUR MOVE TO THE HYBRID CLOUD

Amazon Web Services (AWS) is known for providing a highly configurable, feature-rich cloud offering but it does have a steep learning curve, so many businesses seek support from certified experts to start their hybrid cloud journey to AWS.

The Bunker accelerates hybrid cloud adoption by helping customers architect, deploy, maintain and automate solutions running on AWS infrastructure, ensuring that they get robust, secure and optimised solutions that leverage the scale and flexibility of AWS technology. And because we're The Bunker, you know it's ultra secure and always compliant.

COST EFFECTIVE AND CERTIFIED SUPPORT

Amazon offers different levels of tech support depending on how quickly you need issues resolved and if you need a dedicated account manager or tech support for integrations with third-party plugins if something goes wrong. AWS support fees vary on a sliding scale tied to monthly usage, so support costs can grow quickly if you are a very heavy user.

Our AWS certified cloud experts offer proactive 24x7 monitoring, automation and management to help keep your hybrid IT environments optimised, secure and stable, so you can focus on your core business.

This negates the need for AWS tech support, your team doesn't need to acquire new skills to better manage hybrid IT, it controls costs and can even reduce your current AWS compute spend, whilst getting the best possible results from AWS cloud services.

GET STARTED AND STAY SECURE ON AWS WITH THE BUNKER

An Amazon Machine Image (AMI) is a template that contains the software stack (operating system, application server and applications) or virtual server in the cloud, required to launch an instance on AWS.

We understand the complexities of AWS, which is why we've developed our own set of AMIs, including Microsoft and Open Source operating systems that can be deployed within AWS. This means our customers can access AWS faster, as they do not have to develop their own AMIs and subsequently this avoids unexpected usage bills. For added security, our AMIs are hardened, as Amazon cannot manipulate these once they are uploaded to AWS.

OUR AWS MANAGED SERVICES INCLUDE:

FULLY MANAGED HYBRID IT SOLUTION

SEAMLESS TRANSITION BETWEEN AWS PUBLIC CLOUD AND THE BUNKER

DEDICATED 24/7 SUPPORT, MONITORING, RESPONSE AND RESOLUTION

INFRASTRUCTURE DELIVERY FOR TEMPORARY PROJECT, TESTING OR DEVELOPMENT PURPOSES

SECURITY MANAGEMENT AND COMPLIANCE SUPPORT

CLOUD CONTROL - DETAILED FINANCIAL, OPERATIONAL AND TECHNICAL INSIGHTS FOR OPTIMISING AWS

APPLICATION DEPLOYMENT TO THE AWS PLATFORM

WHY THE BUNKER?

- **DEDICATED 24/7/365 SUPPORT FROM ACCREDITED AWS EXPERTS**
- **OVER 20 YEARS' EXPERIENCE TRADITIONAL HOSTING EXPERIENCE COMBINED WITH DEEP AWS KNOWLEDGE**
- **READY TO DEPLOY HARDENED AMI'S TO ACCESS AWS FASTER, COST EFFECTIVELY AND SECURELY**
- **CERTIFIED EXPERTISE - AWS STANDARD PARTNER**

THE BUNKER PROTOCOL

The Bunker Protocol™ is an all-encompassing methodology that secures against risk and ensures the most secure IT delivery in the UK.

The Bunker Protocol™ incorporates physical, human and digital security capability and processes, and wraps them with a governance and standards layer that ensures that client data and systems are continually secure against threats to confidentiality, integrity and availability.

THIS IS ULTRA SECURE

Physical - Military grade data centres.

Human - All employees are fully background checked and our culture starts and ends with security.

Digital - We build and integrate systems in-house, ultra secure, from the source code up.
