

FACTSHEET**THE BUNKER'S GDPR TOOLKIT****WHAT IS THE GDPR?**

The General Data Protection Regulation (GDPR) (Regulation (EU) 2016/679) is a new regulation by which the European Commission intends to strengthen and unify data protection for individuals within the European Union (EU). It will replace the 1995 Data Protection Directive on 25 May 2018.

Designed to harmonise rules across the EU's 28 member countries, this new regulation makes privacy and data protection integral to technological development and organisational processes. Described as the biggest shake-up to privacy regulation for 20 years, GDPR introduces new and wide-reaching legal obligations relating to how businesses collect, store and share personal information.

**THE CHALLENGES
OF GDPR**

This incoming regulation poses several challenges for businesses. Aside from the 72-hour mandate to disclose a breach, the threat of huge fines, the appointment of a data protection officer and ensuring they and their supply chain uphold diligent data management standards, businesses may also have to revise processes around accessibility, retention and deletion of personal data so they are compliant under these stricter data protection rules.

**THE COUNTDOWN TO
GDPR HAS BEGUN**

Here at The Bunker, we understand that the looming GDPR regulations can seem daunting and potentially costly for many SMEs. With the challenges of internal skills, knowledge, understanding and resource, identifying and managing the vast volumes of personal data coupled with the threat of hefty fines, means non-compliance could be catastrophic for some businesses.

**INTELLIGENCE THROUGH
TECHNOLOGY**

The Bunker's new GDPR Digital Toolkit is specifically designed to help SMEs get GDPR ready, delivering superior intelligence that is impossible to achieve without technology. This comprehensive suite of tools addresses the digital challenges of GDPR, enabling businesses to swiftly, securely and cost effectively manage the rigours that GDPR will place upon them, from both a technical and process perspective.

OUR GDPR TOOLKIT DELIVERS:

ENHANCED DATA ACCESSIBILITY AND MANAGEMENT

COMPREHENSIVE CONTROL AND MANAGEMENT REPORTS

IMPROVED DATA PROTECTION

ROBUST SECURITY AWARENESS TRAINING

INTRODUCING THE BUNKER'S GDPR DIGITAL TOOLKIT

DISCOVERY:

Most organisations will find the task of locating where Personal Information (PI) is stored across their business a major challenge. In line with the new regulation, the location of PI is the first and most challenging step for all. Our new data discovery tool is an on demand service which not only locates all data, but also enables you to build new rules around PI, so you can manage exactly who has access to it for full data control.

PROTECT:

Our data protection service controls data access, applying encryption, data firewalling and data loss prevention tools that protect PI from being accessed, viewed or exfiltrated by unauthorised users, with alerts if any unauthorised activity takes place. Encryption technologies that render PI useless in encrypted format if it is removed from the business accidentally or maliciously.

REPORT:

The stratospheric fines for non-compliance are a door closing threat for many CEOs. Our compliance reporting service covers IT infrastructure, networks, storage, operating systems and applications to deliver a concise, easy to understand, clear status of the business to the board. With automated scanning, reporting and remediation, organisations can ensure known vulnerabilities are always patched, data breaches are controlled and the business remains secure and compliant.

AWARENESS:

Unfortunately, when it comes to information security, people are inevitably the weakest link. Many SMEs undertake some sort of security training, but the GDPR demands a more robust approach to security awareness. Our digital security awareness training is a cloud based subscription service to help you define a new culture of information security. This interactive ongoing programme includes fake phishing emails and other security tests, with comprehensive reporting to allow organisations to develop their awareness programmes and demonstrate an improved security posture.

WHY THE BUNKER?

The GDPR will change the data management culture for businesses. With less than 12 months to get GDPR ready, every organisation, large and small, needs to become compliant. And The Bunker is well prepared. The Bunker has over a decade of experience in deploying compliant, secure systems. Over the years, we have built the necessary methodologies that help meet the most rigorous of standards and compliance

regulations. Our continual assurance approach ensures our customers remain fully compliant, mitigate risk and remain ultra secure, with our transparent, auditable and diligent IT processes to guarantee data protection requirements are met. Along with our own experienced, in-house Data Protection Officer, we can work with you to help prepare for these changes and take the necessary steps towards ensuring full GDPR compliance.
